INDEPENDENT DEVELOPMENT PROJECTS

- **Personal Site:** Created an application to display information about myself, examples of my work, testimonials, contact information and my current resume. I have also included a section for my team members because they have played a huge part in my education. For this application, I used Bootstrap, HTML5, CSS3 and JavaScript/jQuery.
- **StoreFront**: Created a secure application for managing product data. Application is built to simulate an online store front with a shopping cart. Administrators have the ability to manage product, category, and vendor data.
- **S.A.T. Scheduling Administration Tool:** Created a secure application for managing product data. Application is built to simulate an online class scheduling system. Administrators will have the ability to manage students, courses, scheduled classes, and enrollments.
- **Final Project:** Created a secure data driven ASP.NET MVC application from design through deployment for managing the tracking and organization of hardware and software within a company. Administrators have the ability to manage employee data, department data, and all details relating to assigned hardware and software.
